Subject: List of Parameters for Dimock analysis

Jill,

Attached is a table I plan to provide to the On-Site Coordinator (OSC) for the parameter group and list of compounds.

There are five tabs for each parameter. We need to specify what we will be providing up front. If you could look over the list and provide what parameters are "certified", what are On-Demand, and any other stage in between would be helpful.

All info concerning this sampling event and documents on this are located in the

Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy

Please ask any questions. This also is a rush -- as sampling could occur next week.

Thanks
